

## Chalk Stream Water Invertebrates

Mayfly-Olive
Find their 3 tails & note their darting
swimming behaviour

Cased Caddis Fly
These larvae make a home from tiny
stones, twigs or leaves.

Leech
These will not suck your blood! They feed
on detritus or other invertebrates

Bloodworm

These live in any kind of water habitat

True Mayfly
Look for their 3 tails and feathery gills.

Freshwater Shrimp
Found in large numbers, likes clean water

Caseless Caddis Fly

Note their squirmy swimming and the
hooks at the end of the tail

Ramshorn Snail
A small circular snail

Damselfly nymph
An alien looking invert that will turn into a
beautiful damselfly
